

Motor / Stator Tester

Motor Stator Comprehensive tester

AN96951B(F)

Main features

- * **Winding reverse:** Check if the stators winding is reversed
- * **Multi-Channel:** Provide 8 channels configuration to 2 station mode, 16 channels configuration to single station mode
- * **Large ACW capacity:** Standard is 3kV/20mA , but can be up to 5kV/100mA
- * **Large IW capacity:** IW is improved to 0.1uF storage capacitor, stronger identification
- * **Modify ACW mode:** Case High voltage, wire high voltage and phase to phase mode

Application

Suitable to test the stator of Y/ Δ type 3 phase motor, Single phase motor, Brushless motor, Car alternator motor, Synchronous motor, Multi-speed motor.

Stators of Tumbling-box washing machine	Stators of magneto motor	EC stators	Stators of generator	Stators of compressor	Stators of air blower	Stators of plastic encapsulated motor
						

Accessories

- | | |
|--|--|
| <ul style="list-style-type: none"> ★ Connection fixture
Clamp, terminals, probe(elastic and unelastic type) ★ Start control mode
Button on test bench, protection cover, barcode, remote box, foot pedal | <ul style="list-style-type: none"> ★ Return terminal accessories
V groove, circle bridge, metal board, self-priming return terminals |
